

## PLUM Reserves Parachutes

Following our researches on the Skytex 27 with Porcher Sport we contributed to develop, with the same team of engineers, an ultra light fabric dedicated specifically for reserve parachutes. This material associates very high lightness with extremely high resistance to tear required to pass the stringent certification tests (EN 12491).

PLUM Reserve Parachute is certified in 4 sizes:

Technical Data	S	M	L	Tandem
Max in flight weight (kg)	85	95	115	220
Weight inc. lines & risers(kg)	0.983	1.197	1.369	2.700
Weight new container (kg)	0.125	0.125	0.125	

Not only is the PLUM ultra light but it also pack extremely well, therefore, we have designed a range of specific ultra light front mounted containers to reduce to the maximum the presence of the reserve on your harness.

We bring to your attention the fact that due to its compactness the parachute might need to be adapted to your harness container. We advise you to contact the harness manufacturer.
